***A Gift of Life***

Deanna and I recently found out that Devon Nicole's Heart valves went on to help two children somewhere in New England.

Devon's aortic valve was implanted in February into a 3 day old baby boy born with left hypoplastic heart syndrome which is a congenital heart defect.

Devon's pulmonary valve was also implanted in April into a new born baby girl, born with and interrupted aortic arch and a ventriculo-septal defect.

We pray that both children are doing well.

## Baby Steps (continued)

By April we took more baby steps towards making Devon Nicole's House a reality. We filed the Articles of Incorporation and opened a checking account. We deposited all the donations that we had received up to that point. More donations followed..

In May we had our first fund raising event. It was a simple garage sale, but it was a step. As we've moved forward, we've gained confidence and started to set larger goals and expectations from the fundraisers we are planning.

July and August were very hard months for us. We managed to get through the enormous grief that hit us on what would have been Devon's first Birthday.. and the anniversary of her death 5 days later.

In mid-August Deanna and I used a gift certificate from Christmas to try and escape for a night. We joined some friends on the Odyssey for a dinner cruise in Boston harbor. Again our path was being directed. Odyssey will host our first major fundraising event in the year 2001.

In October we finalized our initial Board of Trustees. Our team has started to come together. The chemistry and commitment of every member is amazing to us.

Each day Deanna and I think about Devon. We are committed to pouring our love and time into Devon Nicole's House, the same way that we would have for Devon. As parents we looked forward to helping Devon take her first baby steps and grow into a beautiful little girl. Instead, we are helping Devon Nicole's House take her first baby steps. We pray that you join us in helping her.

Come with us and watch her grow!

Trivia: While Deanna was pregnant with Devon, Devon's favorite food was lemons! That is why this first newsletter is yellow!

# Devon Nicole's House Newsletter

Fall 2000

*On July 30, 1999 a beautiful healthy baby girl named Devon Nicole came into this world. Five short days later she was called back to heaven. This may sound like the end of a story, but as it turns out, it is just the beginning of a journey...*

## **Mission:**

Devon Nicole's House is a Non-Profit Charity that is dedicated to establishing a home-away-from-home for families that have children either awaiting organ donations or that are in a Neonatal Intensive Care Unit (NICU) at any of the Boston area Hospitals. We hope to relieve the parents of the financial worry of how to afford being close to their child during a difficult time

## **Baby Steps:**

In January 2000 Deanna and I, Devon's Mom and Dad, were visiting the Dartmouth Hitchcock Hospital in Lebanon NH for what we hoped would be Deanna's last surgery. Months of sleepless nights had passed since we had lost our little Devon Nicole. We stopped by David's House (a home-away-from-home for families with children at CHaD) to drop off some donated supplies. We stayed long enough to have a brief chat with the home's Executive Director, Jane.... She began to help focus a vision of a Home similar to David's House, but located in Boston. It was a first step.

The immensity of creating Devon Nicole's House is overwhelming. The first obstacle that I saw was: How would we ever raise the money? An answer came in the form of a request. In February I was asked to help with a Capital Campaign to help raise money to expand the church we belonged to. We said yes. When it was all done the team raised 40% more than what they'd hoped for. More to the point, Deanna and I began to realize that we could not raise the money alone. We would have to be lead to the right team.

We began sharing the vision that had been placed in our hearts with some close friends and people we knew at church. That is when the first sets of hands reached out to help steady our steps. People we spoke with were not only touched by what we wanted to do, but they volunteered to help in anyway they could. Then donations started to come in. (cont. page2)
